

Low Cost
3-Phase Brushless D.C.
MOTOR CONTROLLER

NEW
PRODUCT
ANNOUNCEMENT

Syracuse, NY

Kicking off our new line of Brushless D.C. Motor Controls, the BLDC3 series motor controller features 24 VDC operation of BLDC motors rated up to 3 Amperes with Hall Effect sensor commutation. This device employs analog adjustment of speed from 0 - 100% using a three wire potentiometer or a 0 - 5 VDC analog signal. Separate MIN and MAX speed trimmers allow setting of adjustment range. The BLDC3 also employs current sensing with settable trip point and LED indication of overload. Also included is a maintained dry contact input for direction change. Small footprint, convenient pluggable termination and low cost make this control a Best in Class choice.
